Project

House Price Prediction Using ML

- This project presents the use of linear regression and AI techniques to predict house prices, aiming to provide a more accurate method for forecasting based on location, property type, size, and other relevant factors.

Aeroplane Fare Prediction and Recommendation

- This project aims to forecast and recommend the cost of airline tickets by utilizing machine learning, which is a relatively new technology in the aviation sector. The goal is to provide more accurate and personalized offers to customers through the use of recommender systems.

Certifications

Crash Course on Python By Google- **Coursera**

IBM Data science - **Coursera**

Machine Learning By Stanford University - **Coursera**

Python for Machine Learning and Data Science - **Udemy**

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge and belief.

Place: Chennai
